

DIAMOND DUST – Polishing Scrub For Face & Body

Size: 4 oz./120 ml **Skin Type:** All **Purpose:** Refine complexion & smooth skin

Diamond Dust is anyone's best body "smoother" - especially during the dry winter months! It is extremely beneficial to those that suffer from acne, chronic skin disorders and irritating itchiness caused by either dry air conditions or harsh fabrics. The **L-MENTHOL** factor is a superior antibacterial shield and fights all manner of problems.

Whether used as a gentle *facial redefining polish* or an overall *super body scrubber* in the shower or bath, the effects are quite dazzling! And ...thanks to the amazing polishing properties of our unique caged zeolites, there is absolutely none of the microscopic scarring associated with many of the "wrongfully boasted" store brands. There is no doubt about it, once you've used **diamond dust**, you won't be able to be without it!

As a special treat, spoil yourself and go for exhilaration plus, by using **diamond dust** and then cleansing with either **Mint Mantra** or **Ice Shower**. You simply won't believe how your skin feels - but sufficient to say, we'll leave that discovery up to you!

Formula Highlights

- **Diamond Dust** is formulated with rare cage-like structures called **Zeolites**. These unique crystalline spheres are hydrated silicates from volcanoes, whose molecular composition resembles that of a cage, or trap. Chemists often call this factor "**Spin Trap**" as these geodesic formations spin, trap and retain the countless heavy metal pollutants that deposit on our skin through environmental attack.
- **Titanium Dioxide** acts as a powerful light-activated catalyst for antibacterial and anti-viral activity and is a natural sun block.
- The **L-Menthol** in **diamond dust** is extracted from Japanese Mint. At 25,000 parts per million (PPM), it is the most potent source of menthol on the planet - making this left-handed essential oil component more penetrating than DMSO. Its chemo-prophylactic properties keep "foreign invaders" from landing as they simultaneously render existing surface bacteria ineffective. They also serve to keep your product clear of contaminants. L-menthol maintains the chiral purity of the skin during the aging process.
- Right-handed **Vitamin E** or **D-Alpha Tocopherol**, is the only natural version of Vitamin E and is the antioxidant with the best and most widely respected reputation. Sourced from Purslane (portulaca oleracea) where it occurs at 2300 parts per million (PPM), it is hands down more effective than the left-handed version. The racemic combination of left and right, which totally dominates the general skin care and health food industry, is absolutely ineffective, and is used for label claim only.
- Blending Jasmine Alcohol, with the Essential Oils of Peppermint, Grapefruit, and Eucalyptus, creates our tantalizing CHIROMA-THERAPY ratio.
